DE LA SALLE: ONLINE BIDDING FEATURES

Register
There is only one type of account for all users, which is called an Archer. This user would be capable of all of the transactions and actions possible in using the website. A user can both create a listing and participate in all bidding transactions.

View user profile
An archer registration corresponds to a profile in which user details can be seen. This includes personal information such as name, profile picture, college, and ID number. Furthermore, this feature also includes the option to view the listings of an archer.

Edit user details
The user can edit user details such as the profile picture as well as the description of the Archer.

Log in
Upon entering the website, the user will be asked to log in. This will only be possible if the user has previously registered, if not there is an option for registration.

Log out
An Archer can log out of their account in the profile manu and be sent back to the log-in/registration screen.

Create listings
Listings are items that Archers want to put for bidding for other Archers. The seller will provide the item name, item type, images of the item, item description, number of units, price per unit, starting bid, buy out price, and duration of sale.

Browse Listings
On the homepage, Archers can browse through the recent listings that were posted.

Search and filter listings
Archers can find listings by searching for its name, seller, or by filtering item types. This feature allows users to easily find the items they are interested in.

Edit listings
Sellers may edit the listing description and may provide more images of the listing.

Delete listings
Sellers may only delete their listings if no one has placed a bid on their listing yet.

Pin listings
The save feature refers to the capability to save listings an archer may find

interesting. In this way, these items can be accessed for future references and viewing. Listings can be viewed under the user profile option.

Track listing participation
There will be a webpage to track all of the ongoing and past listings by the user. There will be a distinction between the listing in which the Archer participated in as well as the listings posted by the user.

Raise a bid
This will be the main feature of the website since it is where the Archers could shoot their bids until the time runs out for the certain product.

Rate user
Users can be rated to track and record according to their credibility and reliability. These are measured according to a unit entitled animo points. It is a scale ranging from 1 up to 10 in which the mean of the scores are obtained to serve as the grading for a particular user.

Message user
When a transaction has been completed or when a seller/bidder needs to communicate to the bidder/seller, this feature will be utilized.

Create interest groups
In order to be posted on listings which interest the Archers, there is a feature of interest groups which will be called as

Circles (e.g. Men Clothing, PS4 Enthusiasts, Luxury Items). These can be created by the user and other users can then join these Circles to share products related to the Circle.

Join interest groups
Archers can join created interest groups that can assist in further filtering the listings that can be featured. Furthermore, these can serve as hubs for interaction among the members of the circle. Generally, these represent forums within the website.

Edit interest groups
Circle creator can update the details of the interest group. Upon editing, the members are notified with such changes to update their subscription to the circle.

General
Good user experience. Visitor can easily navigate without help, all information are easy to access. Good visual design. Design suits the theme of the application, and is cohesive and consistent across the whole application.
